

HAPPY HEDGEHOGS LTD

Promoting health and hygiene

4.5 Food and drink

Policy statement

This setting regards snack times as an important part of the day. Eating represents a social time for children and adults and helps children to learn about healthy eating. We promote healthy eating and at snack time we aim to provide nutritious snacks, which meet the children's individual needs.

Procedures

We follow these procedures to promote healthy eating in our setting.

- Before a child starts to attend the setting, we find out from parents their children's dietary needs and preferences, including any allergies. (See the Managing Children with Allergies policy.)
- We record information about each child's dietary needs in her/his registration record and parents sign the record to signify that it is correct.
- We regularly consult with parents to ensure that our records of their children's dietary needs - including any allergies - are up to date. Parents sign the up-dated record to signify that it is correct.
- We display current information about individual children's dietary needs so that all staff and volunteers are fully informed about them.
- We implement systems to ensure that children receive only food and drink, including fresh drinking water that is consistent with their dietary needs and preferences as well as their parents' wishes.
- When planning cooking activities, we include foods from the diet of each of the children's cultural backgrounds, providing children with familiar foods and introducing them to new ones.
- We take care not to provide food containing nuts or nut products and are especially vigilant where we have a child who has a known allergy to nuts.
- Through discussion with parents and research reading by staff, we obtain information about the dietary rules of the religious groups, to which children and their parents belong, and of

vegetarians and vegans, and about food allergies. We take account of this information in the provision of food and drinks.

- We require staff to show sensitivity in providing for children's diets and allergies. Staff do not use a child's diet or allergy as a label for the child or make a child feel singled out because of her/his diet or allergy.
- We organise snack times so that they are social occasions in which children and staff participate. All hygiene requirements are in place with the use of anti bacterial spray.
- We use snack times to help children to develop independence through making choices, serving food and drink and feeding themselves.
- We provide children with utensils that are appropriate for their ages and stages of development and that take account of the eating practices in their cultures.
- We have fresh drinking water constantly available for the children. We inform the children about how to obtain the water and that they can ask for water at any time during the day.
- In order to protect children with food allergies, we discourage children from sharing and swapping their food with one another.
- For children who drink milk, we provide semi-skimmed pasteurised milk.
- Ensure staff sit with children to eat their snack so that the mealtime is a social occasion.

Legal Framework

- Regulation (EC) 852/2004 of the European Parliament and of the Council on the hygiene of foodstuffs
